

# SafetyLINK PRO

from ResponseLINK

Affordable and proven “**next generation technology**” that provides an extra layer of safety for your residents if they fall, have a medical emergency or if they just need some assistance with getting out of bed.

Monitored by your own staff and provides 24 hour on site monitoring of your residents.

**Update that obsolete pull cord system** with a wireless communication system for each individual room. This **2-way voice monitoring system** puts you in instant contact with those that need help.

**Now, your residents don't need to lie on the floor waiting for someone to notice they need help!**

Takes them from being down for hours...

...to being up in minutes

This is not the way you want your residents to view your facility. With ResponseLINK, They won't have to because they will have instant access to help!
